SEO AUDIT

Comprehensive Website Analysis

hopehospital.com

Hope Hospital - Best Hospital in Nagpur

Date: April 20, 2026

Prepared for: Dr. B.K. Murali / Hope Hospital Team

Auditor: Claude Code (AI-Powered SEO Analysis)

Domain: https://www.hopehospital.com

1. Executive Summary

72 / 100

Overall SEO Score

78	82	55
TECHNICAL SEO	ON-PAGE SEO	CONTENT
70	**65**	**60**
LOCAL SEO	PERFORMANCE	INDEXING & CRAWLING

Key Findings

Strengths: Solid technical foundation with proper title tags, meta descriptions, Open Graph tags, Twitter Cards, canonical URLs, and structured data (JSON-LD) on all core pages. Google Analytics and Search Console are configured.

Critical Issue: Google has indexed 8+ URLs that no longer exist in the codebase (neurosurgery, critical-care, health-packages, etc.). These are likely returning 404 errors, wasting crawl budget and hurting user experience.

Biggest Gap: Content volume is extremely low for a multispeciality hospital — only 3 blog posts and 3 disease pages. No individual department pages exist. This is the #1 factor limiting organic search growth.

2. Technical SEO (78/100)

2.1 What's Working Well

Element	Status	Details
Title Tags	**PASS**	Unique, keyword-rich titles on all 7 core pages (34-67 chars)
Meta Descriptions	**PASS**	Unique descriptions on all pages (130-160 chars) with CTAs
Open Graph Tags	**PASS**	Complete OG tags (type, url, title, desc, image, locale, site_name)
Twitter Cards	**PASS**	summary_large_image card with all required fields
Canonical URLs	**PASS**	Set on every page pointing to www.hopehospital.com
Structured Data	**PASS**	Hospital, Physician, LocalBusiness, BreadcrumbList schemas on homepage
Favicon	**PASS**	Multiple sizes (16, 32, 192px) + apple-touch-icon
HTML lang Attribute	**PASS**	<html lang="en"> present
Robots Meta	**PASS**	"index, follow" on all pages
Hreflang Tags	**PASS**	en-in, en, x-default on homepage
Geo Meta Tags	**PASS**	geo.region (IN-MH), geo.placename (Nagpur), geo.position
Google Analytics	**PASS**	G-R4J5W7V2Z8 with deferred loading (performance-friendly)
Search Console	**PASS**	Verified via HTML meta tag
Security Headers	**PASS**	X-Content-Type-Options, X-Frame-Options, X-XSS-Protection
Clean URLs	**PASS**	Enabled via Vercel (cleanUrls: true)

2.2 Issues Found

Priority	Issue	Impact
HIGH	**robots.txt sitemap URL missing "www"** Currently: Sitemap: https://hopehospital.com/sitemap.xml Should be: https://www.hopehospital.com/sitemap.xml	Google may not discover sitemap properly
HIGH	**Same OG image for all 7 pages** All pages use hope-hospital-og1.png	Poor social sharing differentiation — all pages look identical when shared
MEDIUM	**No Content-Security-Policy header** in Vercel config	Security gap, minor SEO trust signal
MEDIUM	**No Strict-Transport-Security (HSTS) header**	HTTPS not enforced at header level
LOW	**Copyright in footer says "2024"** — should be 2025 or 2026	Looks outdated to users and search engines
LOW	**Twitter meta uses property= instead of name=** <meta property="twitter:card"> should be <meta name="twitter:card">	Minor spec violation (still works but not standards-compliant)

3. On-Page SEO (82/100)

3.1 Title Tags Analysis

Page	Title	Length	Verdict
Home	Best Hospital in Nagpur | Hope Hospital – NABH Accredited	57	**Good**
About	About Hope Hospital | NABH Accredited Super Specialty Center in Nagpur	67	**Slightly long**
Departments	Medical Departments & Services | Hope Hospital Nagpur	56	**Good**
Hospitals	Our Hospital Locations | Hope Hospital Nagpur	48	**Good**
Empanelments	Insurance & Government Schemes | Hope Hospital Nagpur	55	**Good**
Gallery	Photo Gallery | Hope Hospital Nagpur	38	**Short**
Contact	Contact Us | Hope Hospital Nagpur	34	**Short**

3.2 Meta Descriptions Analysis

Page	Description	Length
Home	Looking for the best hospital in Nagpur? Hope Hospital offers NABH-accredited multispeciality care, expert doctors & 24/7 emergency. Call 1800-233-0000.	155
About	Learn about Hope Hospital Nagpur - Central India first NABH-accredited super specialty center with awards, AI innovation, world-class facilities and expert doctors.	162

Gallery	View photos of Hope Hospital facilities, medical equipment, operation theaters, patient care, and our expert doctors team.	121

3.3 Additional On-Page Issues

Priority	Issue	Details
MEDIUM	**Google rewriting title in SERPs**	Your title: "Best Hospital in Nagpur | Hope Hospital..." Google shows: "AI-Powered Best Hospital in Nagpur | Dr. B.K. Murali..." This means Google finds a better title from your content.
MEDIUM	**H1 on homepage is brand-focused**	"Hope. Healing. Healthcare." lacks keywords. Consider adding a keyword-rich H1 like "Best Hospital in Nagpur"

LOW	**Keywords meta tag too long**	300+ chars of keywords visible to competitors. Search engines ignore this tag entirely — consider removing it.

4. Content Analysis (55/100) — Biggest Gap

4.1 Current Content Inventory

Content Type	Count	Pages
Core Pages	7	Home, About, Departments, Hospitals, Empanelments, Gallery, Contact
Location Pages	1	/nagpur/
Blog Posts	3	Knee replacement guide, Hip replacement guide, Choosing best hospital
Disease Pages	3	Arthritis, Diabetes, Hypertension
Total	**14**	

4.2 Critical Content Gaps

Priority	Missing Content	Impact	Estimated Pages Needed
CRITICAL	**Individual department pages** Orthopedics, Cardiology, Neurosurgery, Oncology, Nephrology, etc.	Losing all "department + Nagpur" searches	10-15 pages
CRITICAL	**More disease/condition pages** Only 3 of 50+ treatable conditions covered	Missing high-intent "treatment in Nagpur" queries	20-30 pages
CRITICAL	**More blog content** Only 3 posts vs competitors with 50-100+ articles	Losing long-tail keyword traffic entirely	2-4 posts/month
HIGH	**FAQ page with FAQ schema**	Missing FAQ rich snippets in Google SERPs	1-2 pages
HIGH	**Doctor profile pages** Only Dr. Murali has visibility	Missing "doctor name + Nagpur" searches	5-10 pages
MEDIUM	**Patient testimonials page**	Missing social proof and review-related keywords	1 page
MEDIUM	**Blog freshness** Last posts dated Nov 2025 — 5 months stale	Signals inactive site to Google	Ongoing

4.3 Keyword Density (Homepage)

Keyword	Frequency	Assessment
"hospital"	25+	**Well-distributed**
"Nagpur"	15+	**Strong geographic signal**
"NABH"	8	**Good authority keyword**
"best"	6+	**Competitive positioning**
"Kamptee"	3	**Low — increase for local SEO**

5. Indexing & Crawling (60/100)

> **Major Problem:** Google has indexed 8+ URLs that do NOT exist in the current codebase. These are likely returning 404 errors, wasting crawl budget, and providing a poor user experience when clicked from search results.

5.1 Orphaned Indexed Pages

Google-Indexed URL	Status in Codebase	Action Needed
/neurosurgery/	**NOT FOUND**	Recreate or 301 redirect to /departments
/critical-care/	**NOT FOUND**	Recreate or 301 redirect to /departments
/health-packages/	**NOT FOUND**	Recreate or 301 redirect to /departments
/news/	**NOT FOUND**	Recreate or 301 redirect to /blog
/gallbladder-symptoms-surgery-tips.../	**NOT FOUND**	Recreate or 301 redirect to /blog
/corporate-empanelment.../	**NOT FOUND**	Recreate or 301 redirect to /empanelments
/list-of-empanelments/	**NOT FOUND**	Recreate or 301 redirect to /empanelments
/total-knee-joint-replacement-surgery/	**NOT FOUND**	Recreate or 301 redirect to blog/knee guide

5.2 Sitemap Analysis

Metric	Value	Notes
URLs in Sitemap	15	Low count for a multispeciality hospital
Last Updated	April 16, 2026	**Recent**
Homepage Priority	1.0	**Correct**
Image Sitemap	Namespace declared but unused	**Add image entries for image SEO**
Orphaned URLs	8+ indexed but not in sitemap	**Must address**

5.3 robots.txt Review

Directive	Status	Notes
User-agent: *	**OK**	Allows all crawlers
Allow: /	**OK**	Root access allowed
Sitemap reference	**ISSUE**	Uses non-www URL — should match canonical www domain
Disallow: /.git/	**OK**	Dev files blocked
Disallow: /node_modules/	**OK**	Dependencies blocked
Crawl-delay: 1	**OK**	Reasonable 1-second delay

6. Local SEO (70/100)

6.1 NAP Consistency (Name, Address, Phone)

Element	Value	Status
Name	Hope Hospital	**Consistent across site**
Address	Near Go-Gas Auto LPG-2, Teka Naka, Kamptee Road, Nagpur - 440026	**Consistent**
Phone	1800-233-0000	**Toll-free, prominent**
Google Maps	Embedded on contact page	**Present**

6.2 Structured Data for Local

Schema Type	Status	Notes
Hospital	**Present**	Name, address, geo, specialties, services
LocalBusiness	**Present**	Complete with geo coordinates
Physician (Dr. Murali)	**Present**	With aggregate rating
ServiceArea	**Missing**	Important for "near me" searches
openingHoursSpecification	**Basic only**	Uses simple openingHours, not detailed specification

6.3 Local SEO Issues

Priority	Issue	Details
HIGH	**Google Business Profile ownership unclear**	GBP is the #1 local ranking factor. Must be claimed and optimized.
HIGH	**Only 1 location landing page**	Need separate pages for Ramdaspeth (Ayushman Hospital) and Pandurna locations
MEDIUM	**Review count mismatch in schema**	Schema says 850 reviews but Google shows 656. Inconsistency can trigger spam filters.
MEDIUM	**Third-party directories outranking for branded terms**	Justdial, Practo appearing prominently for "Hope Hospital Nagpur" — need more domain authority

6.4 Directory Presence

Directory	Listed	URL
Google Business	**Unclear**	Ownership status unknown
Justdial	**Yes**	justdial.com/Nagpur/Hope-Hospital
Practo	**Yes**	practo.com/nagpur/hospital/hope-hospital
Medindia	**Yes**	medindia.net (listed)

Bajaj Finserv Health	**Yes**	bajajfinservhealth.in (listed)
Facebook	**Yes**	facebook.com/hopehospitalnagpur
Instagram	**Yes**	instagram.com/hopehospitalnagpur

7. Performance & Optimization (65/100)

Item	Status	Notes
Image Format	**Partial**	Only 8 of 19 images in WebP format. Remaining use JPEG/PNG.
GA Deferred Loading	**Good**	Loads after user interaction or 2.5s timeout — performance-friendly
CSS Delivery	**Inline**	All CSS is inline — no external stylesheet caching. Increases HTML payload.
JS Minification	**Missing**	No minification pipeline in build process
CSS Minification	**Missing**	No CSS minification
Lazy Loading	**Unknown**	Need to verify loading="lazy" on below-fold images
Core Web Vitals (LCP)	**Not tested**	Run Lighthouse/PageSpeed for actual data
Core Web Vitals (CLS)	**Not tested**	Run Lighthouse/PageSpeed for actual data
Core Web Vitals (INP)	**Not tested**	Run Lighthouse/PageSpeed for actual data
Build Process	**Basic**	Copy script only — no optimization pipeline

7.1 Image Optimization Details

Metric	Value
Total Images	19
WebP Format	8 (42%)
JPEG/PNG Format	11 (58%) — should convert to WebP

8. Competitor & SERP Context

Based on search results analysis, hopehospital.com faces competition from healthcare directories that often outrank the hospital's own pages:

Competitor/Directory	Threat Level	Notes
Justdial (justdial.com)	**Medium**	Ranks for "Hope Hospital Nagpur" + specialty searches. High domain authority.
Practo (practo.com)	**Medium**	Ranks for hospital + doctor searches. Strong healthcare domain.
Medindia (medindia.net)	**Low**	Directory listing, lower visibility.
Other Nagpur hospitals	**Medium**	Competing for "best hospital in Nagpur" keywords.

Key insight: The fact that third-party directories rank prominently for "Hope Hospital" branded queries indicates the domain needs more content, backlinks, and authority signals to outrank aggregators.

9. Top 10 Action Items (Priority Order)

#	Action	Impact	Effort
1	**Fix orphaned indexed URLs** Recreate the 8 missing pages (neurosurgery, critical-care, health-packages, etc.) or add 301 redirects in Vercel config to relevant existing pages.	CRITICAL	MEDIUM
2	**Create individual department pages** Build 10-15 standalone pages for Orthopedics, Cardiology, Neurosurgery, Oncology, Nephrology, etc. with unique content, schema, and internal links.	HIGH	HIGH
3	**Fix robots.txt sitemap URL** Change to: Sitemap: https://www.hopehospital.com/sitemap.xml	HIGH	1 MIN
4	**Fix review count in schema** Update aggregateRating reviewCount from 850 to actual Google review count (656).	HIGH	5 MIN
5	**Publish more blog content** Target 2-4 posts/month covering conditions, treatments, patient guides, and "in Nagpur" keywords.	HIGH	ONGOING
6	**Add FAQ schema** Add FAQPage structured data to homepage and department pages for rich snippet eligibility.	MEDIUM	MEDIUM
7	**Create location pages** Build separate pages for Ramdaspeth (Ayushman Hospital) and Pandurna with LocalBusiness schema.	MEDIUM	MEDIUM
8	**Convert remaining images to WebP** 11 of 19 images still in JPEG/PNG format. Convert for 25-35% size reduction.	MEDIUM	LOW
9	**Add CSS/JS minification** Add a minification step to the build pipeline for faster page loads.	MEDIUM	LOW
10	**Claim/verify Google Business Profile** Ensure GBP is claimed, optimized with photos, services, posts, and Q&A.	HIGH	EXTERNAL
