

Hope Hospital — SEO Performance Report

Period: last 28 days (Google Search Console, to ~15 June 2026)

Headline numbers

Metric	Value
Clicks (visits from Google)	657
Impressions (times we appeared)	16,353
Average click-through rate	4.0%

On "ranking": there isn't one number. What you see on your own phone is **personalised** (Google knows you're Hope Hospital). The positions below are the **true average across all searchers** — the honest figure.

What's working

- "ayushman bharat package list pdf 2026" → **#1 query on the site, 104 clicks** (pos 4.9) - "ayushman package list 2026" → pos 3.2, 43 clicks - "ayushman bharat rate list 2026" → pos 2.4 (31% click rate)

- **Your brand is locked at #1.** "hope hospital nagpur" — position 1.0, **105 clicks** (our single biggest click source). Protected.
- **The Ayushman Bharat guide is the engine of the whole site** — it earns about 90% of all clicks. Its targeted searches are top-of-page:
- **Named doctor profiles earn** — Dr. Nikhil Khobragade and Dr. B.K. Murali pages rank ~pos 5 and pull steady clicks.

Top opportunities (and what we already did about them this week)

These rank on page 1–2 but get few/zero clicks — the biggest near-term wins:

1. **Kidney care (nephrology)** — very high demand, almost no clicks yet: the nephrology page had 1,745 views at a 0.8% click rate; "best nephrologist in nagpur" and "kidney specialist in nagpur" sit pos 11–12 with 0 clicks. *Action this week: strengthened internal links; depth content drafted and awaiting your review.*
2. **"Diseases / treatments covered under Ayushman (PDF/list)"** — 153 + 74 + 63 views at pos 9–12, 0 clicks. *Action this week: added a dedicated Q&A section answering exactly these.*
3. **"ayushman bharat package list pdf"** (without the year) — 345 views, pos 8. *Action this week: tightened the page heading to match this exact phrase and push it toward the top 5.*

What we changed this period

- **This week (18 Jun):** improved the Ayushman guide (new covered-list Q&A + sharper PDF heading), strengthened kidney-care links, added AI-search profile data to 22 doctor pages, tidied page descriptions/ratings, and published a "Kidney Warning Signs" Google post.
- **Earlier (16 Jun):** nephrology page upgrade with a named reviewer, expanded the doctors directory, internal-link consolidation.
- **What to expect:** these target the exact zero-click searches above. SEO changes take 1–3 weeks to show — so the next report is where we will see movement.

Plan for next period

1. **Your sign-off** on the two review packets → unblocks the kidney depth content, disease-page reviewers, and a new "Dialysis Cost in Nagpur" page (the next growth piece).
 2. **Measure** this week's changes against a fresh Search Console export.
 3. **Hold** technical tweaks — the site is clean; the gains now come from kidney-care depth and the Ayushman cluster, not more fixes.
