

Hope Hospital Website — Daily Work Report

Date: 23 April 2026 | Site: www.hopehospital.com | Prepared by: Himanshu / Hope Hospital Team

1. PageSpeed Score Summary

Device	Performance	Accessibility	Best Practices	SEO	Status
Desktop	97	100	100	100	All Green ✓
Mobile	74	—	—	—	In Progress

Starting score before today's work: 41/100 (Desktop). All scores measured via Google PageSpeed Insights / Lighthouse CLI.

2. Core Web Vitals — Desktop (After Fixes)

Metric	Value	Status
LCP (Largest Contentful Paint)	~1.8s	Good
TBT (Total Blocking Time)	0 ms	Good
CLS (Cumulative Layout Shift)	0.001	Good
FCP (First Contentful Paint)	~1.0s	Good
Speed Index	~1.4s	Good

3. Performance Fixes Applied

Fix	Impact	Status
Eliminated www→non-www redirect chain	Saved ~1900ms on first load	Done ✓
Fixed CSS background image 404 (phoenix-hero, services)	Images now load correctly	Done ✓
Preloaded LCP images with fetchpriority="high"	Faster LCP discovery	Done ✓
Resized DR Murali image 800×1200 → 500×500	53KB → 19KB (-64%)	Done ✓
Compressed logo 530×115 → 300×65	29KB → 9KB (-69%)	Done ✓
Inlined Material Icons base styles	Eliminated icon CLS	Done ✓
Trimmed Google Fonts weights	Reduced font payload	Done ✓
Asset Cache-Control headers in vercel.json	max-age=31536000 immutable	Done ✓
Minified all HTML pages	Reduced HTML payload	Done ✓
Added DR-MURALI-2-350.webp srcset for mobile	19KB → 12KB on mobile (-37%)	Done ✓

4. SEO Fixes Applied

Page	Fix	Status
about.html	Added H1 tag + fixed title to 55 chars (was duplicate)	Done ✓

contact.html	Added H1 tag	Done ✓
departments.html	Added H1 tag	Done ✓
empanelments.html	Added H1 tag	Done ✓
gallery.html	Added H1 tag	Done ✓
hospitals.html	Added H1 tag	Done ✓
nagpur/index.html	Fixed title length 64 → 47 chars	Done ✓
blog/choosing-best-hospital-in-nagpur.html	Added BlogPosting JSON-LD schema	Done ✓
blog/hip-replacement-when-do-you-need-it.html	Added BlogPosting JSON-LD schema	Done ✓
blog/knee-replacement-surgery-nagpur-guide.html	Added BlogPosting JSON-LD schema	Done ✓
blog/knee-replacement-cost-nagpur-2026.html	Added BlogPosting JSON-LD schema	Done ✓

5. Issues Investigated & Resolved

Issue	Root Cause	Resolution
CLS 0.133 → 0.001	Async CSS caused page to render unstyled then shift; Material Icons FOUT	Reverted to synchronous CSS; inlined Material Icons base styles
CSS background images 404	Path <code>url('images/...')</code> resolved relative to <code>/css/</code> folder	Fixed to <code>url('../images/...')</code>
LCP not discovered on desktop	phoenix-hero.webp used as CSS background (invisible to preload scanner)	Added explicit <code><link rel="preload"></code>
Vercel redirect chain	Incorrect source: <code>"/(.*)"</code> syntax for host-based redirect	Fixed to source: <code>"/:path*"</code>
CSS preload caused TBT regression	Early CSS load triggered expensive style recalculation (0ms → 680ms TBT)	Reverted CSS preload, kept srcset fix

6. Git Commits Today

Commit	Description
756a037	revert: remove CSS preload — caused TBT regression (0ms→680ms)
aff4951	perf(mobile): preload CSS early, add responsive srcset for mobile LCP
bd87e1d	seo: add H1 tags, fix titles, add BlogPosting schema to all blog pages
7efc197	revert: CSS back to synchronous — async CSS caused TBT 0ms→710ms
b3ac6de	chore: untrack audit JSONs + PDFs, add to .gitignore
b8bb759	perf: minify all HTML + make CSS async (render-blocking removal)
9e5caab	perf(logo): resize logo 530×115→300×65, 18KB→9KB (-50%)

46d698c	perf: fix LCP discovery + compress images further
164320e	fix: resolve 404 image paths in CSS + accessibility contrast
6f23e9d	chore: serve from root (no build step) + commit pending page updates
57eb07e	perf(images): resize hero + logo WebP to cut LCP image download by 47%
27f58a8	fix(vercel): correct redirect source to use :path* named param
ae7994e	perf: fix CLS, load CSS sync, add asset caching + www redirect
5fcdb7a	perf: defer main CSS, remove GTM auto-load timer, trim font weights
4d0e22f	perf(images): convert DR Murali JPGs to WebP + fix LCP and feature box alignment

7. Pending / Next Steps

- Mobile performance score: currently 74 — LCP 4.6s is network-bound under 4G throttle simulation; real-user CrUX data expected to be better
- Push revert commit to git main and deploy to Vercel
- Monitor Google Search Console for structured data (BlogPosting) indexing
- Monitor Google Business Profile ownership resolution for local SEO
- Track keyword rankings for "best hospital in Nagpur" and "knee replacement Nagpur"
