

Today's Work Summary

Date: 13 May 2026 | Project: Hope Hospital Nagpur (hopehospital.com)

1. Fixed Footer Logo & Contact Number Layout

- Removed problematic inline style (height:60px;width:auto;object-fit:contain) from footer logo across all **42 HTML pages**
- Updated logo dimensions from 180x44 to **220x54** for better appearance
- Added **max-width:100%; height:auto** to CSS for proper mobile scaling
- Fixed contact number wrapping in emergency strip on small screens (white-space:normal on mobile)
- Updated both **styles.css** and **styles.min.css**

2. UTF-8 Mojibake Encoding Fix (Committed Previously)

- Fixed double-encoded characters (em dash, en dash, rupee sign, star, check mark) across 18+ files
- Affected pages: all 9 service pages, 8 blog posts, nagpur/index.html, review.html, review-card.html

3. Google Business Profile & Directory Submissions

- Submitted blog article to **BigAdda** (pending approval)
- Submitted business listing to **FreeListingIndia** — Listing #1140245 (LIVE)
- Wrote SEO-optimized business description and introduction
- Provided listing tags, LinkedIn/Twitter URLs, and category suggestions

4. SEO Blog Content Created

- Written 5500+ character article: "Best Hospital in Nagpur | NABH Accredited Orthopedic & Multispeciality Care — Hope Hospital"
- Optimized with high-search keywords as H2 headings:

Best Hospital in Nagpur

Best Orthopedic Surgeon Nagpur

Knee Replacement Cost Nagpur

Ayushman Bharat Hospital

Kidney Transplant Nagpur

Cardiac Surgery Nagpur

5. Git Activity

- **Commit 1 (e46ec9b):** "fix: correct UTF-8 mojibake encoding across all pages" — 21 files changed
- **Commit 2 (93c5359):** "fix: responsive footer logo sizing across all pages" — 40 files changed, pushed to main
