SEO AUDIT ISSUES

1 • ON-PAGE SEO — HOMEPAGE TITLE & META

Task	Detail	Status
Title (keyword-first)	Set home title to <code>Best Hospital in Nagpur Hope Hospital - NABH Accredited</code> (57 chars) — exact keyword front-loaded	Pushed
Meta description	Trust-loaded: "Central India's first NABH-accredited super-specialty hospital... 200+ beds, 24/7 emergency... ☎ 0712-2980073"	Pushed
Social tags	Mirrored new title/description into <code>og:</code> and <code>twitter:</code> tags	Done

Goal: protect the winning branded query while improving CTR on branded/near-branded impressions.

2 • REVIEW COUNT ACCURACY (402 → 406)

Task	Detail	Status
Schema reviewCount	Updated <code>aggregateRating</code> on all pages 402 → 406 to match live Google Business Profile	Fixed
Visible "402+" stats	Updated all on-page review counts (doctor profile, blogs) to 406	Fixed
Source of truth	Bumped <code>master-context.md</code> + audit <code>EXPECTED_REVIEWS</code> = 406 (37 files total)	Done

Rating stays accurate at 3.9★ — never inflated. Historical records (ledger, dated reports) deliberately untouched.

3 • STRUCTURED DATA — MEDICALCLINIC SCHEMA

Task	Detail	Status
Coverage gap closed	Added <code>MedicalClinic</code> schema to 5 missing department pages: nephrology, colorectal, gastroenterology, minimal-invasive, mother-child	Pushed
Now consistent	All 10/10 department pages carry MedicalClinic with department-specific procedures + NAP	Done

4 • BLOG NAP / E-E-A-T FIXES

Page	Fix	Status
choosing-best-hospital (ranks #7)	Stale "50+ Google reviews" → 406; "established 2005" → 2004 ; pincode 440017 → 440026	Fixed
Internal link	Added homepage link in conclusion to funnel authority to the home page	Done

Strengthens the page Google already favours for "best hospital" intent; fixes NAP inconsistency (a local-SEO signal).

5 • CONTENT CLEANUP — MATERNITY BLOG REMOVED

Task	Detail	Status
Page deleted	Removed <code>/blog/best-maternity-hospital-nagpur</code> (≈0 GSC traffic)	Done
References cleaned	Removed sitemap entry + blog cards on home page & blog index	Fixed
301 redirect	Old URL → <code>/services/maternity-hospital-nagpur</code> (vercel.json) — preserves equity, no 404	Live

6 • FOOTER REDESIGN — SITEWIDE CONSISTENCY

Task	Detail	Status
Treatments column	Split overloaded column → clean 5-column footer (4→5 col grid) across all pages	Fixed
Orphan pages styled	Injected the footer CSS into 9 pages that had footer markup but no styles (blog index, press release, 8 disease pages)	Done
Alignment & layout	Left-aligned columns; flush navy footer (removed old gray band + gap); synced "Get Directions" button + logo size; added mobile responsive collapse	Fixed
Root-cause fix	Footer text was falling back to system font — pages declared <code>Inter</code> but never loaded it; set footer to loaded Open Sans to match homepage	Root cause

Result: every page's footer (home, blog, departments, services, diseases) now renders identically.

7 • COMPETITOR RESEARCH & STRATEGY

Finding	Detail
Why Max ranks #1	"best hospital in nagpur" #1 = Max (national chain, ~42 doctors, 4.3★); #2 CARE (4.4★/2,747 reviews). Gap is authority + reviews + medical team — not on-page copy.
Biggest on-site gap	Hope shows 1 doctor profile vs competitors' dozens. Building the real medical team (Physician schema + "Our Doctors") is the top E-E-A-T lever.
Action plan written	best-hospital-nagpur-action-plan-2026-05-25.md — sequenced off-site roadmap (reviews 3.9→4.3★, GBP, citations, backlinks)

8 • GBP — REVIEWS

Task	Detail	Status
New 5★ reviews	Drafted warm, distinct reply templates for 2 new reviews (Shubham Mendhekar, Salman Maladhari)	Done
Rating movement	Google count rose 402 → 406 reviews (still 3.9★) — reviews drive is working	Win

9 • GIT COMMIT (PUSHED TO LIVE SITE)

Hash	Change
b151c58	seo + footer: keyword-first home title, 402→406 reviews, dept schema, unified footer (66 files, +295 / -195)

Pushed to `main` → auto-deploys to live site via Vercel.

10 • PENDING / NEXT STEPS

Action	Owner	Status
Provide real doctor details (name, qualifications, specialty, photo) for medical-team build-out	Hospital	Awaiting
Build doctor profiles + Physician schema + homepage "Our Doctors" section	SEO	Queued
Reply to the 2 new reviews in GBP; keep running reviews SOP (3.9★ → 4.3★)	Front desk / Marketing	In progress
GSC URL Inspection → Request Indexing (home + redirected maternity URL)	SEO	Pending
